

BlueTube[®] Technology

UV-LED optical fiber curing far beyond the state of the art

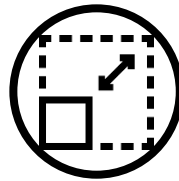

The BlueTube[®] UV-LED System designed for curing optical fiber coatings demonstrates unprecedented performance thanks to its unique technology.

Patented Technology

Revolutionary Gas Flow

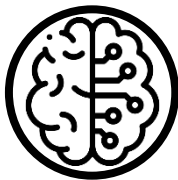

Minimized Form Factor

Easy Mounting to Fiber Drawing Tower

Intuitive Touch Screen Control

Intelligent Software Control and Analysis

Real-time in-situ Monitoring

Fabrication Protocol and Full Traceability

58% Power Saving
90% Inert Gas Saving

Revolutionary Eye & Skin Safety

100% Industry Proven by Global Players

10 Years Full Warranty
